

FASS Dichtungen Private Limited

FASS is promoted by a group of engineers having proven track record of Hydraulic Cylinder Manufacturing and Repairing from 1996. With vast knowledge of Mill Cylinder design, manufacturing, modification and repairs, **FASS** team will be more effective in providing solutions for various applications.

Apart from Ready To Supply stock of standard & imported sealing system for European and American OEM's, our in-house manufacturing enables us to provide simple, economical and quick sealing in emergency or breakdown conditions.

We can quickly manufacture & supply an otherwise obsolescent seal kit for a particular old cylinder and an odd profiled or designed seal is easily possible with us.

FASS is ideally equipped to meet the demands of today's sealing technology and building upon a foundation of experience & excellence ensures that it will continue to be capable of meeting the future demands of the hydraulic and pneumatic sealing.

A Unique Advantage with FASS:

Our very own Customer Stores Management System has biggest advantage to our valuable clients. We keep the stock of regular and critical requirement to minimise inventory cost of our clients.

For OEM's, Due to in-depth knowledge in hydraulic cylinder and equipment field, the FASS team can offer Total Technical Support to meet their needs in Design, Manufacturing of Hydraulic and Pneumatic Cylinder, Equipment and Systems

For Plant maintenance, FASS team can offer ON-SITE services for complete overhauling of the cylinders and equipment on a truly large scale. Real strength to our customers in their maintenance.

We serve

- Steel industry
- Cement industry
- Mining industry
- Cotton industry
- Automotive industry
- Construction industry
- Power industry
- Material Handling industry
- Plastic & rubber processing industry
- Food and pharmaceutical industry
- General mechanical engineering

FASS commitment

Knowledge

To engineer and manufacture Tailor-made sealing.

Aim

To solve any kind of industrial sealing problem.

Reliability

To provide a complete range of products and services.

Response

To ensure on time delivery
